SOP Pull-Back & Fetch

 IN PROGRESS **Green**

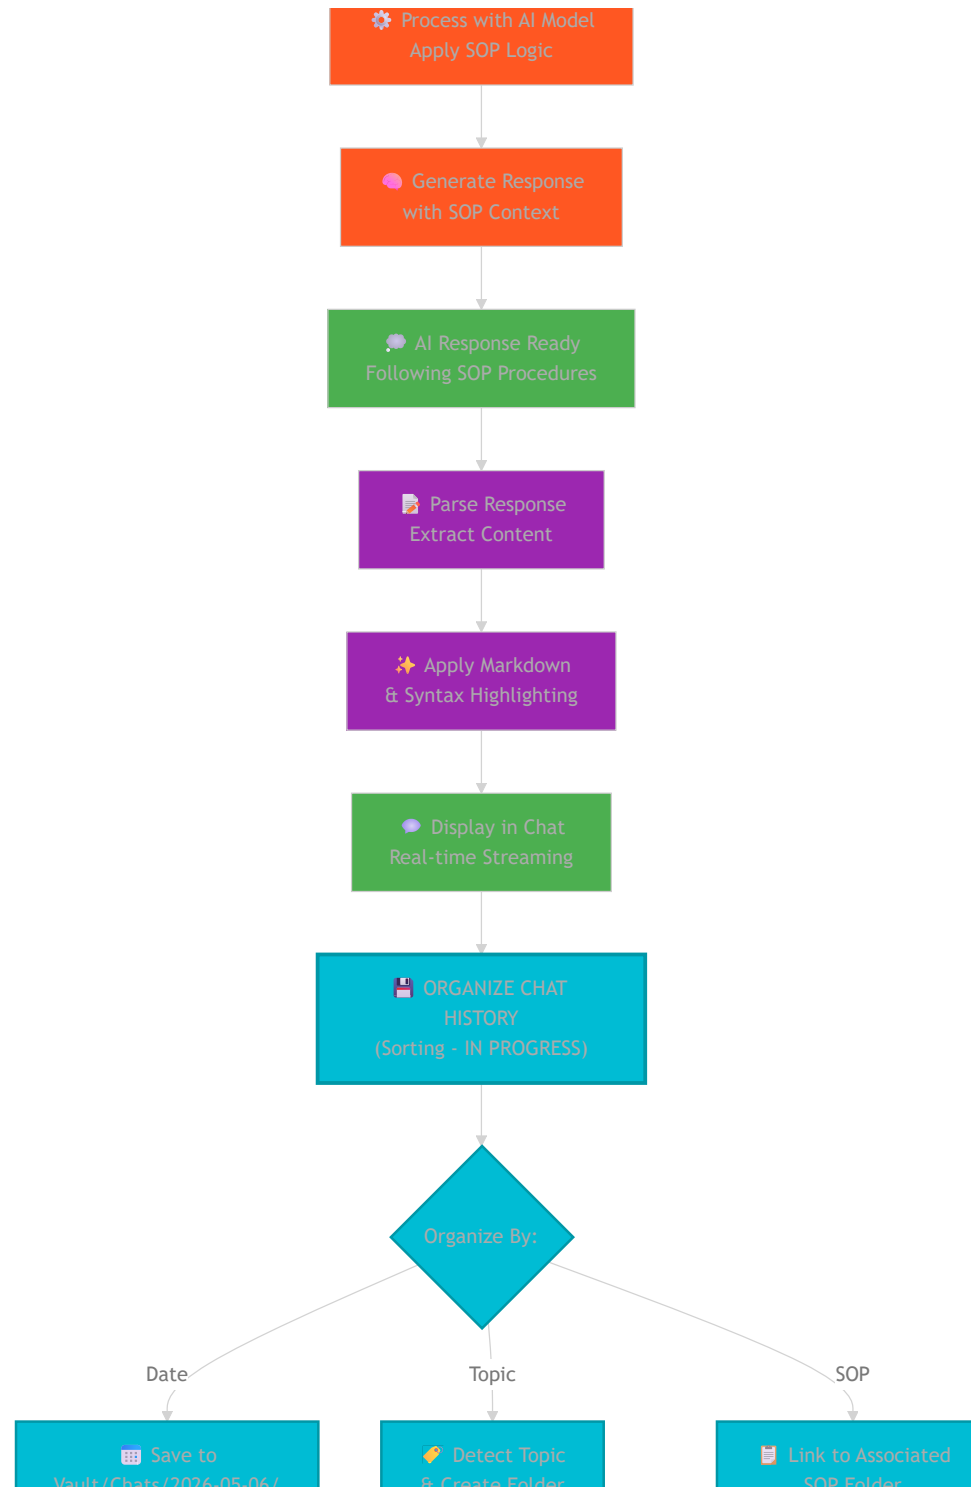

Final Output & Storage

 Completed

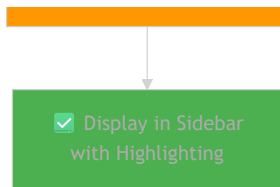

🚧 In-Progress Features

1. 🔌 Ollama Integration Enhancement

Status: Currently being integrated with the server

Focus: Optimizing connection pooling, adding model health checks, improving fallback mechanisms, testing with different Ollama versions

2. 📁 Chat History Organization

Status: Implementing sorting and categorization

Planned: Date-Based Sorting, Topic-Based Sorting, SOP Folder-Wise Sorting, Search & Filter, Tagging System, Archive/Pin functionality

3. 🔄 Pull-Back Request & SOP Logic Integration

Status: Live fetching and smart SOP connection

Includes: Dynamic SOP pulling, intelligent matching, real-time SOP logic application, bidirectional connection between questions and SOPs
